Dear Developer Network member:

The Microsoft® Windows NT™ product team and the Microsoft Developer Network team are pleased to provide to all Developer Network Level 2 members this package containing the components of the Microsoft Windows NT version 3.5 beta for developers. You are receiving the beta release of Windows NT 3.5, the pre-release of the Win32® Software Development Kit (SDK), the pre-release of the Windows NT Device Driver Kit (DDK), and the pre-release of Win32s™ version 1.2. In addition, the final release of Win32s version 1.15 is included.

The beta package contains the following components:

- Developer Network Development Platform Disc 1 containing the Windows NT 3.5 beta, the Win32 SDK, and the Win32s libraries
- Developer Network Development Platform Disc 2 containing the Windows NT DDK
- Three 3.5-inch boot disks for Windows NT 3.5
- Release notes for the Win32 SDK and the Windows NT DDK

Please install and use the beta release of Windows NT 3.5 as soon as possible. **The beta is supported through a forum on CompuServe® called DAYTONADEV**. This forum is being monitored by experienced support personnel and will be your only line for support and feedback.

Sincerely,

The Microsoft Developer Network team and the Windows NT product team
